secure, reliable fastening.

Strong metal wires engineered
for dependable performance.

Engineered steel doors and
windows for every space.

Galvanised steel solutions with
enduring beauty and protection.

Reliable hollow sections for
stronger structural applications.

Durable roof and wall cladding
solutions for lasting protection.

DIRECTOR'S MESSAGE

SRMB Srijan Private Ltd. is an IMS certified seven decades-old Primary Steel Producer company (classified by the Joint Plant Committee under ministry of steel). The seed of the idea that our founder late Radha Kishan Beriwal ji sowed in 1951 turned into a huge tree today. Since its inception, we have had a penchant for being innovative. SRMB is the first TMT manufacturer in India to receive TEMPCORE license from CRM Belgium. We have pioneered the WINGRIP rib design for TMT bars, which is a result of the group's constant zeal to improve the existing designs for adding more value to the products. Since 2013 we have launched various Grill products like RealEdge, RealEdge Galva and RealFabrica. Now SRMB has forayed into its new venture and is introducing new range of products - SRMB REALROOF for colourful PPGL sheets. Our goal is to provide our consumers with 360-degree solutions right from design to fabrication.

Ashish Beriwal

Director
SRMB Srijan Private Limited

A ROOF THAT DOES MORE

A roof isn't just a finishing touch. It protects everything underneath it.

RealRoof is designed to deliver strength, durability and clean aesthetics in one smart solution. Made from high-quality galvanised iron, it stands up to tough weather, resists wear and keeps its finish intact over time.

Whether it's a home, a workspace or a large structure, RealRoof is built to perform consistently, day after day.

Backed by SRMB, it's a roof you don't have to think twice about.
